Madrid, 18th. February, 2013

Dear Director-General,

The Spanish National Commission for UNESCO has received documentation from the "Comarca de la Molina y el Alto Aragón" requesting its inclusion in the European Geoparks Network.

The main natural resource of the area is the Tajo river, the largest in Spain and the core of the geopark which creates an area of excellent geological geodiversity and heritage. The inclusion of the "Comarca de la Molina y el Alto Aragón" in the European Geoparks Network will add an important geological value to the net and will help increase its natural heritage in the region.

Regarding such an interesting request, endorsed by central, regional and local authorities and the most important scientific and geologic institutions, the Spanish National is pleased to communicate its official support to the candidacy of "Comarca de la Molina y el Alto Aragón" to join the European Geoparks Network.

Dear Director-General, please accept the assurances of my highest consideration.

Spanish National Commission for UNESCO
Secretary-General

Jaime Segura Socias
